

Company Overview

Founded in 1999, LoadSpring Solutions develops and markets an easy-to-use application hosting system called the CAM Console™ that helps large organizations increase profits by streamlining access to software using the Internet while declaring independence from IT infrastructure costs and complexities. LoadSpring is a business partner with its customers, driving the success of their outsourcing objectives with an emphasis on security and infrastructure management along with 24 x 7 support and Service Level Guarantees.

ABOUT US

Products

CAM Console

— An Internet-based hosting system, the CAM Console enables project teams of any size to securely access and share project management applications and data via an Internet connection from anywhere in the world to LoadSpring's data center infrastructure and hosted applications.

InsidEnterprise™

— InsidEnterprise is a local network version of our industry-leading CAM Console product. InsidEnterprise is designed for corporations who want the power of a unified interface for remote access to software, but do not want to outsource the IT infrastructure to LoadSpring.
